

Name _____ Class _____ Date _____

There are several things that need to be organized at Spacy Sam's party.

Drinks

Seventeen children are at the party. Spacy Sam's mom bought lemonade, limeade and orange juice. She asked Counting Carrie to help her with the orders.

1. Counting Carrie worked out that three children wanted limeade and that three times as many children wanted lemonade. The number of children that wanted orange juice was two more than the number who asked for lime ade.

Please explain to Spacy Sam's mom exactly how many of each drink she needs to pour.

Sausage rolls:

Hot dogs:

Challenge:

Spacy Sam wants to play a game of Musical Bobs. All seventeen children are playing. If two people get out each time the music stops, how many times will the music stop before there is only one person left?

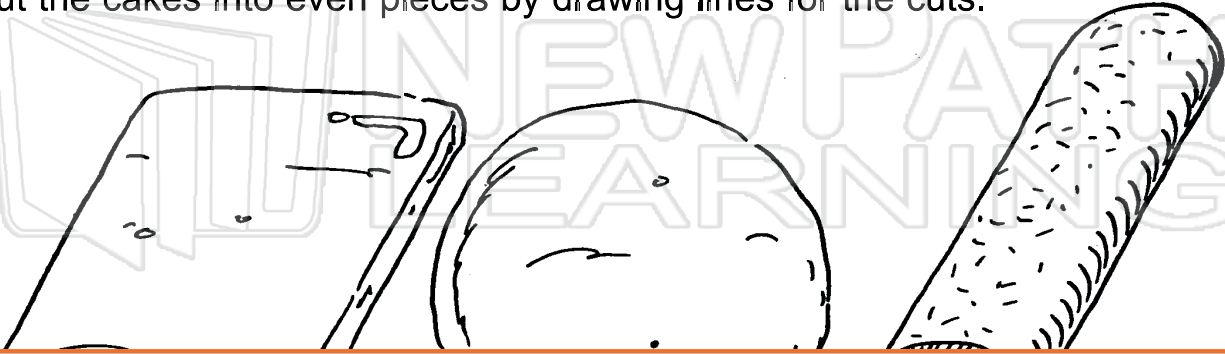

Name _____ Class _____ Date _____

Birthday cake

It's time to eat the birthday cake at Spacy Sam's party. Sam's mom made three different sized cakes because she wasn't sure how many children would like a slice.

Cut the cakes into even pieces by drawing lines for the cuts:
