

Name \_\_\_\_\_ Class \_\_\_\_\_ Date \_\_\_\_\_

Every Sunday Galileo and his family eat hamburgers for dinner. Mrs. Galileo gets confused as everybody likes different things in their hamburger, so she now calls an order to the burger place before she gets there.

She knows that: Everyone in the family likes meat, lettuce and tomato;  
She likes pickle but doesn't like onion or cheese;  
Galileo likes cheese but not pickle or egg;  
Gary Galileo does not like egg or onion but loves pickle;  
Gina Galileo does not like onion or pickle but likes cheese.

Mrs. Galileo phoned through her order and was given two extra burgers for making things easier. Here is the order she gave:

egg | cheese

egg | cheese

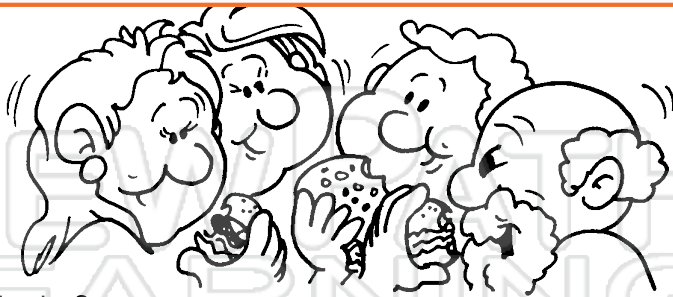

egg | cheese

## PREVIEW

Please [Sign In](#) or [Sign Up](#) to download the printable version of this worksheet

Egg:	50¢
Onion:	60¢
Cheese:	35¢
Pickle:	45¢

3. What would the total cost of the order be? .....

### Challenge:

How many times can you subtract the number 6 from 36?
