

CONTRACTIONS

What is a Contraction?

A contraction is really two words squeezed together to make a new word. Some of the letters from one or both of the words go away and a special mark called an apostrophe goes in their place.

Examples:

- **Do + not = don't**
(Notice that the **o** in 'not' is gone. The apostrophe takes its place.)
- **Can + not = can't**
(One **n** and the **o** are gone. The apostrophe takes the place of both.)
- **It + is = it's**

- T
- C
- V
- V
- C
- P
