DRAWING INFERENCES

What are Drawing Inferences?

Drawing an **inference** is the act of drawing a logical conclusion based on the facts written in a text, a reader's background knowledge, and a reader's personal information.

When reading, you can use clues in the story AND your experiences to make an inference about what you think is going on in a story.

You may not read a certain fact, but you can infer that the fact is true by reading the facts and clues the author writes in the text.
