

## SEQUENCE

### What is Sequence?

SEQUENCE = order

A **sequence** of events is the order in which events occurs.

When you write the steps to the process of a task, the steps should be written in the correct ORDER so that someone can follow the steps to complete the task properly.

If you are telling a story about an incident that took place, it is important to tell the correct sequence of events so people understand the

#### Examples of transition phrases:

- in the meantime
- at the same time
- in the beginning

*Example of a sequence of steps, with transition words:*

### How to Brush Your Teeth

**First**, you put a small amount of toothpaste on your toothbrush.

**Next**, you wet your toothbrush carefully.

**Then**, you brush your upper and lower teeth for 2 minutes.

**Next**, you rinse your mouth out with water and spit into the sink.

**Finally**, you rinse your toothbrush and put it away.

A graphic showing a row of diverse children standing on a green patch of grass. Above them are four thought bubbles containing various educational icons: a cube, a microscope, a protractor, a globe, a chemistry flask, a globe, a DNA helix, a pie chart, a bar graph, and a calculator. The word "ABC" is also visible in one of the bubbles.
