The **bold**, underlined words above are called **ORDINAL** numbers.

Ordinal numbers tell the **position** of someone or something.

**More Examples of Ordinals:**

If there are five people in front of you in line, you are the **SIXTH** person in line.

If there are six people in front of you in line, you are the **SEVENTH** person in line.

If there are seven people in front of you in line, you are the **EIGHTH** person in line.

If there are eight people in front of you in line, you are the **NINTH** person in line.

If there are nine people in front of you in line, you are the **TENTH** person in line.
