THE PROGRESSIVE MOVEMENT

What is the Progressive Movement?

In the beginning of the 1900's, the American middle class wanted to see a change. The Progressives thought that the government should become involved with the people and help them have better lives.

During the Progressive movement, citizens found out how poorly people were being treated and tried to change this. Progressives asked for help from the government and they agreed. **Amendments** were passed to help citizens. **Women's Suffrage** and **Prohibition** were two of these amendments.
