6. _____ - a triangle with 2 sides that are the same length

7. _____ - a triangle with a right angle (90 degrees)

8. _____ - a triangle with sides of all different lengths

ANSWER KEY

Match each of the following terms to its definition:

Isosceles triangle

Area

Right triangle

Area of a rectangle

Equilateral triangle

Scalene triangle

Area of a triangle

Area of a square

1. **Area** - the space that is within a geometric space

2. **Area of a rectangle** - all of the space inside the shape; area (A) of a rectangle equals the length (l) times the width (w): $A = l \times w$

3. Area of a square is $s \times s$

4. Area of a triangle is the triangle's base times its height divided by 2

PREVIEW

5. Equilateral triangle has 3 equal sides
