

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Angiosperm

Algae

Amphibian

Classification

Mammal

Archaea

Animal

Autotroph

1. _____ - warm-blooded organisms that have body hair, a four-chambered heart, produce milk for their young, and breathe air with their lungs

2. _____ - a vertebrate that is ectothermic (cold-blooded) that spends part of its life in the water and part of its life on land; it begins its life in water and breathes through gills

3. _____ - plants with flowers that have seeds in a fruit; they range in size from small herbs to large trees

4. _____ - plants that have seeds but do not have flowers

5. _____ - organisms that can make their own food from inorganic substances

6. _____ - known as ancient bacteria; a kingdom of scientific classification which includes organisms that are unicellular, do not have a nucleus, some make their own food and some need to obtain food from other sources; often found in harsh environments

7. _____ - a living organism, such as algae, that is capable of producing its own food; also called a producer

8. _____ - the process of grouping items together according to their similarities

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Angiosperm

Algae

Amphibian

Classification

Mammal

Archaeobacteria

Animal

Autotroph

1. **mammal** - warm-blooded organisms that have body hair, a four-chambered heart, produce milk for their young, and breathe air with their lungs

2. **amphibian** - a vertebrate that is ectothermic (cold-blooded) that spends part of its life in the water and part of its life on land; it begins its life in water and breathes with lungs

3. **algae** - simple organisms that grow from unicellular to large multicellular forms with chloroplasts

4. **angiosperm** - plants that produce seeds enclosed in a protective covering

5. **animal** - a living organism that is capable of movement and lacks a cell wall
