6. _____ - how long a plant takes to grow, flower, and make seeds

NEW PATH
LEARNING

7. _____ - single-celled, animal-like protist that has the ability to move

8. _____ - cold-blooded vertebrates that breathe through their lungs, usually have skin covered with scales and lay eggs

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Mycelium
Kingdom

Reptiles
Protozoa

Plant life cycle
Invertebrate

Phloem
Hyphae

1. **hyphae** - threadlike filaments of branching cells that make up the bodies of multicellular fungi

2. **invertebrate** - animal that does not have a backbone; some of the major groups of invertebrates are cnidarians, arthropods, worms and mollusks

3. **kingdom** - the taxonomic rank of a group of animals, plants, fungi, or protists

4. **mycelium** - the vegetative part of a fungus consisting of a mass of branching, threadlike hyphae

5. **phloem** - the plant tissue that carries organic nutrients
