

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Lysosome

DNA

Microscope

Facilitated diffusion

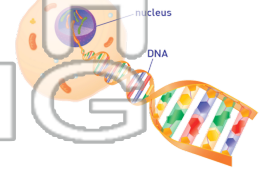

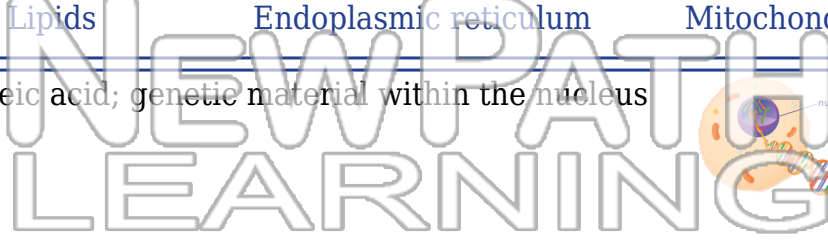

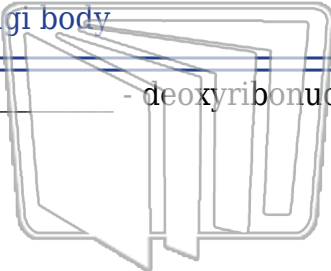

Golgi body

Lipids

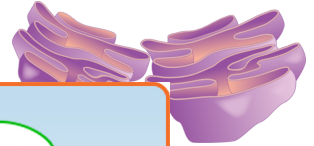

Endoplasmic reticulum

Mitochondrion

1. _____ - deoxyribonucleic acid; genetic material within the nucleus

2. _____ - a transport system of tubes and channels connecting cell organelles; a transport system that moves different materials around the cell

3. _____ molecule

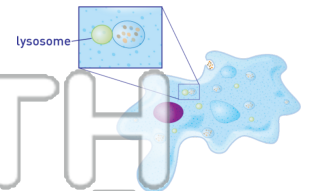

4. _____ cell when

5. _____ the element
compos

PREVIEW
Please [Sign In](#) or [Sign Up](#) to download the printable version of this worksheet

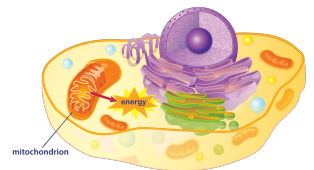

6. _____ - a cell organelle that contains chemicals (enzymes) to break down food and recycle waste materials

7. _____ - a tool used by scientists to make small things appear larger so that they are easier to observe and study; an instrument that magnifies small objects

8. _____ - a rod-like organelle that converts the energy in food molecules to cellular energy through the process of cellular respiration

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Lysosome

DNA

Microscope

Facilitated diffusion

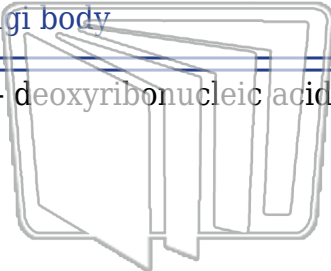

Golgi body

Lipids

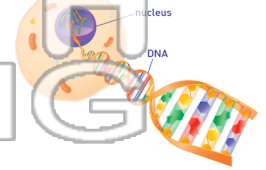

Endoplasmic reticulum

Mitochondrion

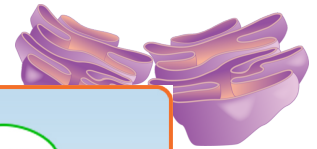

1. **DNA** - deoxyribonucleic acid; genetic material within the nucleus
