

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Condensation

Coriolis effect

Air Quality Index

Carbon monoxide

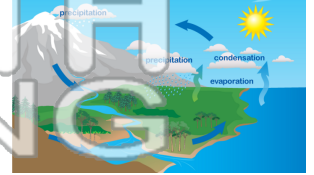

Aquifer

Water cycle

Atmospheric pressure

Atmosphere

1. _____ - the movement and recycling of the Earth's water from the Earth's surface to the atmosphere and back again

2. _____ - an index which uses numbers and colors to tell about the quality of air around you

Air Quality Index	
201 - 300	very unhealthy
151 - 200	unhealthy
51 - 100	moderate
1 - 50	good

3. _____
it to mov

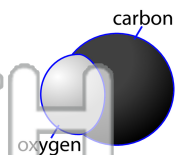

4. _____

5. _____
also calle

6. _____ - a colorless and odorless gas; it is highly poisonous gas and can cause death

7. _____ - the process by which water vapor (gas) cools and becomes liquid droplets of water

8. _____ - the apparent curving motion of an object caused by the rotation of the surface on which it is moving; the curved direction of global winds caused by the Earth's rotation on its axis

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Condensation

Coriolis effect

Air Quality Index

Carbon monoxide

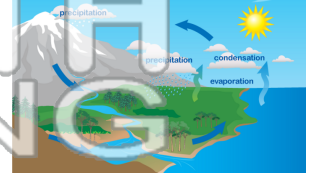

Aquifer

Water cycle

Atmospheric pressure

Atmosphere

1. **water cycle** - the movement and recycling of the Earth's water from the Earth's surface to the atmosphere and back again

2. **Air Quality Index** - an index which uses numbers and colors to tell about the quality of air around you

Air Quality Index	
201 - 300	very unhealthy
151 - 200	unhealthy
51 - 100	moderate
1 - 50	good

3. **aquifer** - a layer of rock that contains water that can be moved through it

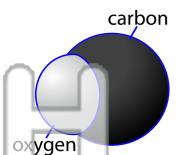

4. **atmosphere** - the layer of gases that surrounds the Earth

5. **atmospheric pressure** - the force exerted by the weight of the atmosphere on a surface
