

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Bilateral symmetry

Archaeobacteria

Animal

Behavior

Carnivore

Algae

Autotroph

Angiosperm

1. _____ - a large and diverse group of simple, plant-like protists ranging from unicellular to multicellular organisms; plant-like protists that contain chloroplasts and are autotrophic

2. _____ - a plant that produces flowers and develops fruit around its seeds

3. _____ organism

4. _____ classification nucleus, sources;

5. _____ producing

6. _____ - all of the actions that an animal performs

7. _____ - symmetry produces a mirror image if a line is drawn through it at one certain place only

8. _____ - a consumer that gets its energy by eating only other animals

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Bilateral symmetry

Archaeobacteria

Animal

Behavior

Carnivore

Algae

Autotroph

Angiosperm

1. **algae** - a large and diverse group of simple, plant-like protists ranging from unicellular to multicellular organisms; plant-like protists that contain chloroplasts and are autotrophic

2. **angiosperm** - a plant that produces flowers and develops fruit around its seeds

3. **animal** - capable of movement

4. **archaeobacteria** - classification based on the presence of a nucleus, membrane, and other sources; they are prokaryotes

5. **autotroph** - an organism that produces its own food
