

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Sublittoral zone

Tidal pool

Radiation

Pangaea

Sea-floor spreading

Pelagic environment

Subduction

Transform boundary

1. _____ - the large, single continental landmass that formed approximately 245 million years ago; according to the theory of continental drift all of the continents were originally together as a single large landmass called Pangaea

2. _____ - the marine environment that refers to the entire volume of ocean water in the world

3. _____ given off

4. _____ from each

5. _____ tectonic
