4. _____ hardens

5. _____

6. _____ - metamorphic rock characterized by layered mineralization

7. _____ - rocks that form from cooling magma or lava

8. _____ - igneous rock that is trapped and hardens under the Earth's crust

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Felsic

Igneous rock

Chemical sedimentary rock

Foliated rock

Clastic sedimentary rock

Extrusive

Contact metamorphism

Intrusive

1. **chemical sedimentary rock** - sedimentary rock formed by the chemical precipitation of minerals from water

2. **clastic sedimentary rock** - sedimentary rock composed of fragments of other rocks

3. **contact metamorphism** - process of metamorphism from being in contact with an igneous rock

4. **extrusive igneous rock** - igneous rock that hardens on the Earth's surface

5. **felsic igneous rock** - igneous rock with a high silica content

6. **foliated rock** - metamorphic rock characterized by layered mineralization

7. **igneous rock** - rocks that form from cooling magma or lava

8. **intrusive igneous rock** - igneous rock that is trapped and hardens under the Earth's crust
