

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Rock cycle

Magma

Sedimentary rock

Chemical sedimentary rock

Metamorphic rock

Nonfoliated rock

Regional metamorphism

Organic sedimentary

1. _____ - liquid rock that is trapped under the Earth's crust

2. _____ - rock that has changed form due to intense heat and pressure

3. _____
arranger

4. _____
material

5. _____
mountain

PREVIEW
Please [Sign In](#) or [Sign Up](#) to download the printable version of this worksheet

6. _____ - the interconnection of geologic processes by which one rock type is turned into another rock type

7. _____ - rock formed by the processes of weathering and erosion, transportation, deposition and cementation

8. _____ - sedimentary rock formed by the chemical precipitation of minerals from water

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Rock cycle

Magma

Sedimentary rock

Chemical sedimentary rock

Metamorphic rock

Nonfoliated rock

Regional metamorphism

Organic sedimentary

1. **magma** - liquid rock that is trapped under the Earth's crust

2. **metamorphic rock** - rock that has changed form due to intense heat and pressure

3. **nonfoliated** - rock with no arrangement of minerals

4. **organic** - rock containing shell material

5. **regional** - metamorphism over a large area due to pressure
