I. S

1. moon orbits around planet

2. moon doesn't have any light only reflects the Sun

C. goes around the Sun

1. takes 365 days = 1 year

III. Gravity

A. a force

1. really strong force

2. rockets can break through the Earth's gravity

B. pulls objects toward the center of Earth

1. other planets have gravity

2. when objects go into orbit they don't have gravity and that's why they float around
