

Name \_\_\_\_\_ Class \_\_\_\_\_ Date \_\_\_\_\_

1 **Gregor Mendel** laid the foundation for what field of science?

- A biology
- B ecology
- C genetics
- D botany

2 What kind of **plant** did Gregor Mendel test the most?

- A corn
- B grass
- C roses
- D peas

3 What is a **characteristic** that Gregor Mendel looked for on his pea plants?

4 In studying **genetics**, what did Gregor Mendel notice about the pea plants he studied?

## PREVIEW

7 **A** It is the gene of an organism.  
**B** It is the different forms of a gene.  
**C** It is how a gene is chosen.  
**D** It is the best gene.

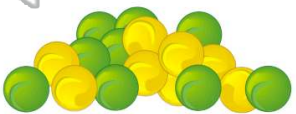

- A 1
- B 2
- C 3
- D 4

9 Organisms receive **one allele** for every **gene**.

- A true
- B false

10 A **dominant allele**  
**A** overpowers and masks the other allele  
**B** is better than other alleles  
**C** is worse than other alleles  
**D** is masked by another allele
