7 What **substances** are filtered out through the **nephrons**?

- A water
- B blood cells
- C glucose
- D urea

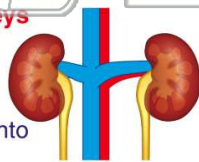

8 Are **ureters** filtered by the **nephrons** of the kidney.

- A true
- B false

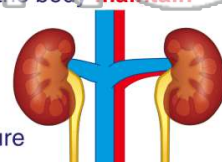

9 In addition to filtering out **urea**, another **function of the kidneys** is to _____.

- A produce proteins
- B convert the waste into usable materials
- C maintain water levels in the body
- D help to pump blood around the body

10 The **kidneys** help the body **maintain** _____.

- A homeostasis
- B nephronites
- C body temperature
- D insulin
