

Name _____ Class _____ Date _____

1 Rock formed from **erupting lava that cools** is called _____.

- A extrusive sedimentary
- B intrusive metamorphic
- C extrusive igneous
- D intrusive igneous

2 _____ **sedimentary rocks** form through **precipitation or crystallization of dissolved minerals**.

- A clastic
- B intrusive
- C organic
- D chemical

3 **Shale** is a(n) _____ rock composed of **layers of deposited and cemented rock particles**.

4 Rocks that form by the **cooling and hardening** of **liquid rock material** are called _____.

7 **metamorphic rock.**

True or false?

- A True
- B False

- obsidian** A. glassy, fast-cooling igneous rock
- granite** B. clastic sedimentary rock
- sandstone** C. foliated metamorphic rock
- conglomerate**

9 Match the term with the correct definition.

- limestone** A. organic or chemical sedimentary rock used for construction
- basalt** B. extrusive igneous rock found on the ocean floor
- marble** C. nonfoliated metamorphic rock used for building columns
- coal**

10 Match the term with the correct definition.

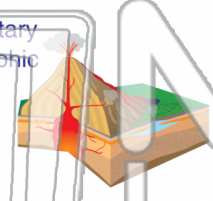

- pumice** A. metamorphic rock that forms from shale
- slate** B. igneous rock that floats on water
- coral** C. organic sedimentary rock
- sandstone**
